

PMS RentalReady Releases 08.2025 (August)

Onboarding

Multi unit hotel onboarding - search bar for shared amenities

- Added a search bar to the hotel shared amenities selection modal in multi-unit onboarding step 1.2
- Users can now quickly filter through amenities by typing in the search field with real time results
- Shows a "No amenities found matching your search" message when no results match and automatically clears the search when the modal is closed

New property onboarding process released on 19/08/2025

- Step Request onboarding will be removed
- To hand off property from Onboarding team to Distribution team, you will need to Activate the property. You can leave Onboarding comment, or add Onboarding assignee.
- Approve property will be renamed to Activate property
- Property page will display new Property onboarding banner, from where you can access a page with all mandatory fields needed for property Activation. You can also keep on using Rental form / Property edit page, the same way as today.
- The email sent to owner will be sent if: Property is active, Property has 1st listing

Listing photos - Logs now stored at Property history level

At property level > Options > *Property history*

We now store changes made at the listing photos level for actions such as deleting or adding pictures. You can see the value "Amount: x" before and after each action.

Note that we record the actions of adding and deleting, but we do not store the pictures themselves.

Multi-Unit - Property page update

On property page that is part of a multi-unit hotel, we have

- added link to the room type
- removed the section with units

Calendar

Property calendar - New display for calendar settings

You can see the change to customise the calendar view (to show details of prices, missions (cancelled or not), cancelled reservations (with fee or not)).

Channel Manager

Airbnb has changed how prices are shown

They'll now show the total price (including fees) upfront.

<https://news.airbnb.com/total-price-display-is-now-standard-globally/>

Enhancements to Pricing settings & Promotion page (Rental & Office Level)

We've made a few updates to the Promotions page to improve navigation and consistency. What's new :

- Tabs moved to Topbar - The navigation tabs have been repositioned into the topbar for a cleaner layout, easier access and consistency.
- Create Promotion button is now located next to Export CSV (at both Rental and Office levels).
- On the Office level, the Actions button now is located right next to Create Promotion for a more intuitive workflow.
- Improved Navigation - Added a Back button at the Office level to easily return to the previous page.
- Integrated Help - Added a direct link to our Help Center from the Promotions page for quick access to documentation.
- Consistency Fixes - Standardised page naming across the platform for a uniform experience.

VRBO Reservation Flow Improvements

To reduce unpaid reservations and prevent repetitive guest cancellations, we've implemented the following updates to the VRBO reservation and payment flow.

1. Dynamic Payment Deadlines Based on Booking Window: The time guests have to complete payment now adapts to how far in advance the reservation is made:

- Stays in the next 48 hours → 4 hours to pay
- 48 hours to 1 week ahead → 8 hours to pay
- 1 to 4 weeks ahead → 12 hours to pay
- More than 4 weeks ahead → 24 hours to pay

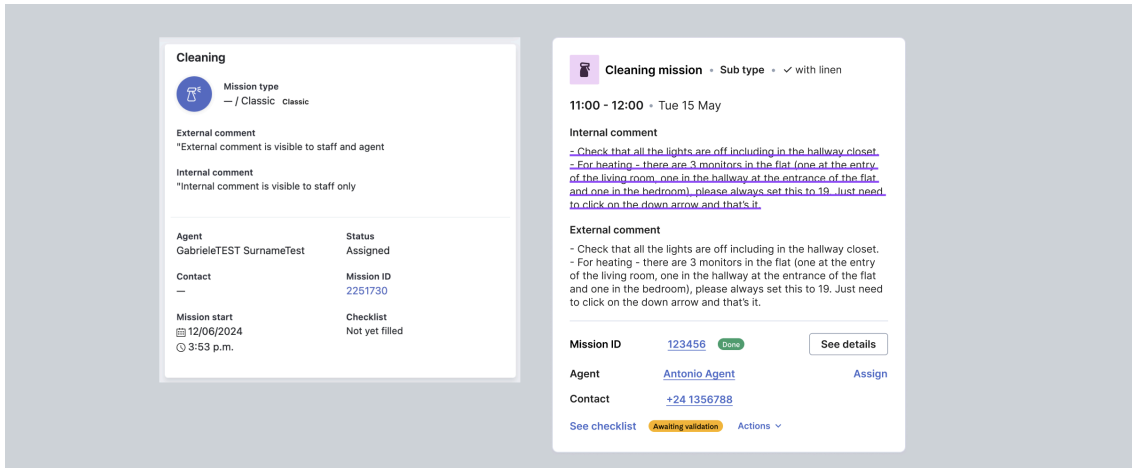

2. Improved Cancellation Email Messaging: We've updated the cancellation email to include a clear and direct tip for guests: *"To avoid cancellation again, please complete payment immediately after booking."* This is to prevent guests from falling into a loop of booking → cancellation → rebooking → cancellation again.

3. [Coming Early September] Pre-Cancellation Reminder Email A reminder email will be sent 2 hours before the cancellation deadline if payment has not been completed. This gives guests one last nudge to pay before losing their reservation.

Missions

Premium class styles on dashboards

- We've updated the color of premium classes on all dashboards to match the rest of RentalReady
- We've also updated badges on all dashboards to use white text on darker backgrounds and black text on lighter backgrounds (instead of always using white text)

Agents

Average rating in agent space

We have reviewed the logic of the "average rating" section in the agent space. This widget now reflects the average rating across all the agent's missions, both check-in and cleaning missions.

HomeReady

New email alert for new incidents reported

New field *Email notification for new incident*: if enabled, property managers will receive an email alert for all new incidents reported by agents.

HomeReady - "Save" button upon issue creation

On the ticket creation page, when user clicked on "Save", the button was disabled for a while, but then active again, creating confusion for users, leading to duplicated issues.

Now, the button "Save" is disabled for good, until the user is redirected to the ticket details page.

Reservations

Early check-in and late check-out in reservation details page

We've added some more information about early check-in and late check-out upsellings to reservation details page:

- The upselling requests linked to a reservation will be displayed in a banner at the top of the page
- If early check-in or late check-out is enabled for the property, we display a new section *Upselling* with all the conditions met or not by the reservation:
 - *Can be available for guest* - current time is within the upselling range *Guest can submit request from / no later than*
 - *Can be available for staff* - check-in/check-out is in the next 3 days and the reservation can be displayed in *Eligible reservations* page
 - *No active early check-in request* - the reservation doesn't have a pending or approved ECI request.
 - *Previous cleaning is completed* - previous cleaning mission is done and the checklist is filled
 - *No extra missions until check-in*
 - *No active late check-out request* - the reservation doesn't have a pending or approved LCO request.
 - *No reservation on check-out day*
 - *No extra missions until check-out*

- ✗ No active late check-out request
- ✓ No reservation on check-out day
- ✓ No extra missions until check-out

Guest mood associated to trigger REVIEW_CHASER

REVIEW_CHASER guest notification was not sent for some reservations because we were still relying on the guest mood per message instead of the guest mood at reservation level. This has now been updated and we rely on what is displayed on the reservation details page to trigger or not this email based on the guest mood.

We've improved Airbnb reservation cancellations

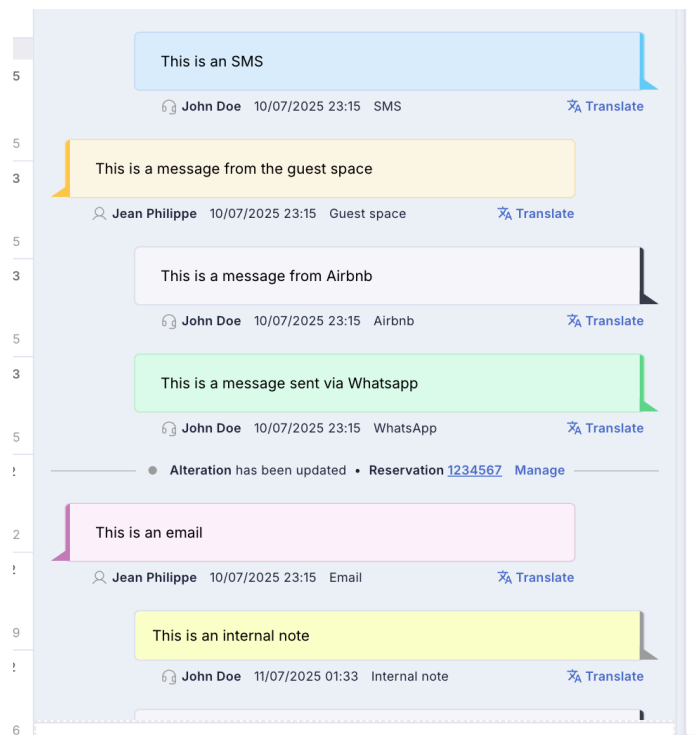

- **Two types of modals** depending on the situation:
 - **Cancellable reservations** → shows cancellation reasons, guest info, and a "Dismiss" option.
 - **Non-cancellable reservations** → explains why it can't be cancelled and directs you to Airbnb.
 - few **minor UI** updates

Mailbox

Mailbox: design changes for messages

- We have added background colour to messages in the mailbox to make it easier to differentiate message types
- We have changed the alignment of messages to make it easier to differentiate between messages sent by guests and those sent by staff

Link unknown messages sender to reservation

We have implemented a feature that allows users to link an unknown sender in the mailbox to a reservation.

- The mailbox conversations that are not linked to any reservation will no longer have the *Overview* tab disabled. Instead, users will see a form where they can enter the reservation ID to associate the messages with the correct reservation.
- Once linked, the conversation will be merged with the existing conversation for that reservation.

With this number connected to the reservation, it becomes the temporary messaging number, and will be used as a default until 7 days before check-out.

- All the WhatsApp messages for the conversation, both inbound and outbound, will be sent from or received by that number.
- This number can also be disconnected from the reservation.
- A reservation cannot have multiple temporary phone numbers at the same time.
- After those 7 days, the default phone number will revert to the reservation's original phone number.

Mailbox flags in conversation events

To make it easier to skim conversation events, we've added a coloured icon to "flag added" conversation events

Pin internal notes

- We've added a new "internal notes" section to the conversation overview — here you can see all internal notes and conversation events from a conversation

- It's now possible to pin internal notes, which means that they will appear at the top of the "internal notes" section in the conversation overview, and will be highlighted in orange in the conversation view.
- You can pin and unpin internal notes via the conversation overview, or via the conversation view

The screenshot shows a 'Conversation overview' modal with a sidebar on the left containing various filters like 'hours', 'days', 'minutes', and 'hour'. The modal has a 'Close' button in the top right corner. Below the filter tabs (Summary, Photos, Videos, Files, Internal notes), the 'Internal notes' section is active, displaying a list of notes. The notes are sorted by 'Oldest first'. The first note is 'URGENT' by John Doe, dated 21/07/2025 17:05, and is pinned. The second note is 'This conversation has been created blank from reservation 469193' dated 08/07/2025 19:18. Subsequent notes include reviews, flags added, and escalations, all attributed to andrea.crawford.

Additional badges shown in mailbox reservation section

We have added additional badges to the reservation section in the mailbox sidebar:

- Property premium class
- Guest VIP status
- "Mid-term" or "long-term" badge, based on property rental category

Guest notifications

Security Deposit request now sent only after CONFIRMED

We've deployed a fix to ensure that guest messages are sent in the correct order.

Before: Previously, we improved the speed of our guest notifications by sending the Deposit Request

email every 20 minutes instead of every 6 hours. While this was a great change, it sometimes caused the Deposit Request to be sent before the Confirmed message (sent every 10 minutes), especially for last-minute bookings. This created a confusing experience for guests, as they'd receive a payment request before their reservation was officially confirmed.

Now: The Security Deposit Request notification will now only be sent after the Confirmed message. This ensures the correct, logical order for all guest communication, providing a smoother and more professional experience.

Guest registration required for self check-in instructions

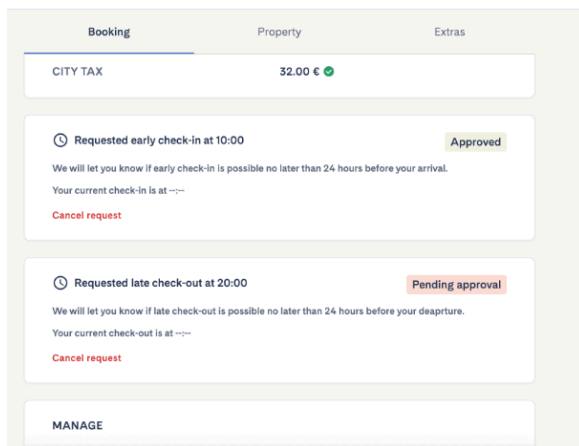

We've introduced a new setting to control when self check-in instructions are sent to guests. A new field has been added to the office form: *Guest registration submitted for all guests for self check-in instructions*.

When enabled, self check-in instructions will only be sent after the guest registration has been submitted for all required guests.

Guest Space

Upselling request status displayed in Guest Space

We've added the status of the reservation upselling requests in the Guest Space, under the *Booking* tab. Now, the guests can see their pending requests and can also cancel them if needed. The cancellation is available for the requests that are not confirmed and applied to the reservation already.

Owners

Portugal SAF-T Files now downloadable in Owner Space

Owners can now download their Portuguese SAF-T XML files directly from the Owner Space.

This significantly streamlines a critical compliance step for them.

Source: The files are seamlessly fetched from Hostkit via our new integration

Location: Owners will find these files under the Owner Space > Accounting section > new tab: "SAF-T report"

Visibility: Please note, this new "SAF-T report" tab will only be visible if:

- Owner has a permission [Can see SAF-T files tab host space accounting page](#)
- The Property Manager's invoice engine = Hostkit

Notification: Additionally, an email notification titled "Your SAF-T report is ready." will be sent to relevant owners each month when the new file becomes available, including the XML file directly in the email for their convenience.

SAF-T Report Ready

Hi John Doe,

We're writing to let you know that your monthly Portugal SAF-T report for 7, 2025 is now ready for download!

What is SAF-T?

The SAF-T (Standard Audit File for Tax) is a legally required monthly file submission in Portugal. It includes detailed accounting and invoicing data for tax compliance.

You can easily access this report directly within your Owner Space:

1. Log in to your Owner Space
2. Navigate to the **Accounting** section
3. Click on the "**SAF-T report**" tab

For your convenience, we've also attached the XML file to this email. This is the file you'll need to upload to the Portuguese Tax Authority's e-Fatura portal for compliance.

Important: Ensure the file is submitted to the Portuguese Tax Authority (AT) by the 5th of each month for the previous period.

If you have any questions, please don't hesitate to reach out to our support team.

Best regards,
GuestReady Portugal

Promotions Integration

You can now create and manage **promotions** directly in RentalReady. Each integration can support different Promotions, Booking.com being the Integration that will get the most value from it right now.

Booking.com:

- Basic Promotion - Create fully customisable offers with your own conditions, discounts, and booking windows.
- Early Booker - Offer discounts to guests who book well in advance to secure early revenue and fill low-season gaps.
- Last Minute - Apply discounts to last-minute stays to quickly sell remaining availability and boost visibility.
- Geo Rate - Target specific regions with exclusive discounts to increase visibility in those markets.
- Mobile Rate - Provide discounted rates for users booking via mobile apps or browsers to attract more traffic. (only 1 per Hotel)

Airbnb and Vrbo:

New Listing Discount – Automatically gives a 30% discount to the first 3 reservations of a new listing to help build momentum and reviews. There's also a relation between the previous Toggle and this new way to create Promotions.

- You enable it on settings → it creates the promotions | You disable it on Settings → it deletes the promotion
- You create the promotion → it enables the setting | You delete the promotion → it disables the setting.

Rate Rules UI Revamp

The Rate Rules interface in RentalReady has been redesigned to match the Promotions UI, in order to bring consistency. What's New:

- Unified Design: Rate Rules now share the same layout and styling as Promotions, providing a familiar experience.
- Office level: You can create rate rules for all rentals at once using the actions button at Office level.
- Filters Added: New filters allow you to quickly check and sort your rate rules by type, date range, period name, and whether they are always applied.
- Improved Usability: Easier navigation and clearer structure to create, edit, and manage rate rules.

RentalReady Apps

New version of the agent and owner mobile apps

We have released a new version of the apps RentalReady Agents and RentalReady Owners to the Play Store and the App Store.

Improvements:

1. We re-wrote the notification system to make it more stable. Users who previously had issues receiving notifications should start receiving them next time they open the app.
2. We removed the "zoom-in" effect when clicking on a form field on iOS. This is especially useful to avoid having to zoom back on the checklist form.
3. We corrected an issue that prevented using autocomplete on the login page on Android.
4. Some routine updates for stability.

Staff user app - Mid-term price rounding on property calendar

The mid-term prices are now rounded in the property calendar. This way:

- the logic is unified between short-term and mid-term prices
- it improves the mobile compatibility, especially in the new RentalReady PMS mobile app
